

Safeguard your deployment with the design review service for SAP Customer Data Cloud solutions

SAP experts assist you or your partner to optimize your solution design

Business outcomes

- Meet your identified business needs with the SAP Customer Data Cloud solution design
- Reduce time for deployment, future upgrades, and maintenance through actionable recommendations provided by SAP solution experts
- Gain confidence in the solution with a standardized design that minimizes customizations

Business relevance

- Comparison and analysis of your SAP Customer Data Cloud solution against SAP best practices and implementation experience
- Planning to lead your own deployment or use a systems integrator
- Experiencing post-implementation business challenges related to solution design or want to expand solution usage

Deliverables and time frames

The design review service for SAP Customer Data Cloud:

- Reviews the business requirements and the related technical design plans
- Conducts a maturity assessment of the solution architecture with a focus on performance, stability, and scalability
- Performs workshops to identify solution design improvement recommendations

This service is fixed scope and fixed fee and is delivered remotely over two weeks.
