Get ready to innovate with the **quick-start service for central finance dashboards**

Improve decision-making and reporting based on real-time data

Software + Service = Solution

Business outcomes

- Enhance the user experience with KPIs, trends, and resolutions for 900+ errors based on project experiences
- Empower users leveraging preconfigured content for accounting documents, structured error metrics, and links to error resolution guides

Business relevance

This service is ideal if you are looking for quick access to real-time data. It improves the visualization of relevant data, identifies trends, and automates error resolution.

Deliverables and timeline

- Deploy predefined central finance dashboards in a single test system for SAP Analytics Cloud
- Install views and OData setup and import content for SAP Analytics Cloud
- Set up and test the dashboards and perform functional readiness checks
- Provide go-live support and knowledge transfer for up to two continuous business days

Service is delivered remotely over four weeks.
