

Baseline activation service for SAP Digital Manufacturing

- ▶ With the baseline activation service for SAP Digital Manufacturing service component, the customer will receive an integrated cloud based MES with quick time-to-value. This service provides the baseline integrated environment for the customer to take the next step towards implementing additional functional scope based on their specific requirements, with the goal of achieving a production system rollout.

Business needs

- Expert guidance on the implementation of SAP Digital Manufacturing
- Delivery of a configured SAP Digital Manufacturing Cloud test system with demonstrated integration to the customer ERP system (either SAP S/4HANA or SAP ECC)
- Effective knowledge transfer to ensure the capability of the customer team to continue with rollout

Delivery approach and scope

The service has the following key phases:

- **Prepare:** Configure the integration between the SAP DM test system and the customer (non-productive) ERP system
- **Explore:** Validate the integrated solution with customer test data

Value and benefits

- Quick time-to-value for an integrated SAP DM- SAP ERP environment
- Jump start on the rollout plan for the plant
- Documentation assets provided as an output of the service
