Optimize the performance of your solution with the
performance review service for SAP® Commerce Cloud

SAP Commerce Cloud solution experts assist you or your partner by analyzing, validating, and providing recommendations to optimize the performance of your solution.

Business Outcomes

- Optimize the performance of your SAP® Commerce Cloud solution, pre- or post-go-live
- Minimize risk due to reduction of bottlenecks, optimize setup, and prepare for peak times of business (such as major holidays, seasonal periods, and big events)
- Gain confidence in the flexibility and agility of SAP Commerce Cloud to enable you to operate and compete, even as industries reshape at unprecedented speed and e-commerce models change

Business Relevance

- The performance review service for SAP Commerce Cloud analyzes your performance test strategy, test plans, and KPIs. SAP experts help identify bottlenecks and current performance pitfalls and provide actionable recommendations for improvement and optimization.
- This service is ideal for active customers experiencing postimplementation challenges related to the performance of their solution.
- This service is beneficial for net-new projects if you're planning to lead your own deployment or use a systems integrator, or if you simply require a point of view from SAP Customer Experience experts.

Deliverables and Time Frames

SAP Commerce Cloud experts review your solution performance requirements and provide detailed recommendations, with a specific focus on the following:

- Current solution performance
- Application profiling and performance tests
- Analysis and reporting on load-test data and/or production data

This is a fixed-scope and fixed-fee service delivered remotely over a three-week timeline.
