# Get ready to innovate with the **quick-start service for SAP S/4HANA Cloud for credit integration, public edition**

Connect to credit rating agencies to improve the quality of credit decisions

Software + Service = Solution

## Business outcomes

- Improve real-time business decision-making based on customer and market data
- Improve the accuracy of internal customer credit scoring
- Support data-driven credit management decisions
- Facilitate the integration between SAP S/4HANA and third-party systems

## Business relevance

- This quick-start service is aimed at businesses looking to improve their credit management decision-making.
- With established integration between SAP S/4HANA and third-party systems, it allows businesses to retrieve real-time credit scoring data automatically.

## Deliverables and time frames

- Project preparation and customer enablement on the solution
- Technical preparation integrating your system environment
- Realization and deployment of the automated credit integration process
- Integration testing execution
- Knowledge transfer in the format of a "how-to" document describing the integration of the new fields within the existing cloud service
- Assistance with the move to a single production system
- Go-live support for up to 10 continuous business days

The estimated duration for the service is three months. The service is delivered remotely.
