

# Faster solution deployment with the **accelerated implementation service for SAP Commerce Cloud**

Go-live with your SAP Commerce Cloud solution quickly with help from SAP experts

## Business outcomes

- Implement the SAP Commerce Cloud solution based on proven, product-specific methodologies and best practices designed to maintain a clean core
- Achieve a faster, more cost-effective deployment with less IT involvement
- Enable business users on key prepackaged solution features so they may better identify future customizations

## Business relevance

- This service provides a quick and reliable implementation to optimize time to value and maximize return on solution investment
- SAP Commerce Cloud is built on a foundation that is focused on maintaining a clean core, making future updates and customizations easier

## Deliverables and time frames

The accelerated implementation service provides:

- Review of the agreed upon process and technology scope
- Setup, configuration, and deployment of SAP Commerce Cloud to your development and test sandboxes
- Assistance deploying to your production environment

This is a fixed-scope fixed-fee service, delivered remotely over nine weeks, followed by one week of hypercare.
